What was done well?

*I missed the initial hardware but quickly got involved with a very typical patient. It was very realistic & provided a good platform & environment in which to practise & enhance our skills. Thankyou.*

How could it be improved?

Method of teaching	✓			
Opportunity to ask questions	✓			
Relevance to your work	✓			

What was done well?

- \* Impromptu - really good to be thrown in the deep end.
- \* Fab acting! Realistic, better than a SIM man.
- \* Holistic care as opposed to focusing on just A-E - thought about collateral and priorities in elderly car.
- \* Relevant to ED.

How could it be improved?
