NEED AND ‘WHAT MATTERS’

WHAT DOES MANAGERS PAY ATTENTION TO?

- ACHIEVE LOW COSTS THROUGH ECONOMIES OF SCALE
- ACHIEVE EFFICIENCIES THROUGH STANDARDISATION
 - MAKE PEOPLE FOLLOW PROTOCOL AND PROCEDURES
- LEAD BY KPIS, TARGETS AND REPORTS
 - BEST PRACTICE, PATHWAYS AND PROTOCOLS
- ACHIEVE QUALITY THROUGH INSPECTION

UNDERSTANDING DEMAND

**TYPICALLY
40-70%**

VALUE DEMAND

FAILURE DEMAND

Demand related to purpose – what we exist to serve

Demand caused by a failure to do something or do something right for a customer

DEMAND

The nature of demand in to an organisation is a symptom of how well the organisation as a system works from the customers' point of view

ERADICATING FAILURE DEMAND

Failure Demand is caused by a failure of the system to do something or do something right for the customer.

Up to 70% of all demand in to service organisations is Failure Demand - consuming immense capacity.

Failure Demand is prevented by changing the systemic causes – leading to improved customer experience at lower cost to the system.

Could we work in a different way??

The Vanguard Method in Primary Care Services.

Liz Reader

Practice Care Co ordinator

Purpose

Provide me with a help which matches my life context, health situation and abilities, so that I can live a good life, die a good death

Individual Value
Need What Matters?

Understand the system from the person's perspective

Method

Purpose

Provide me with a help which matches my life context, health situation and abilities, so that I can live a good life, die a good death

Operational working principles:

- 1) A person's individual need and **'what matters'** to them determines what we do and how we do it, and
- 2) We proactively look after the people seamlessly and with a high degree of continuity.

Value Demand

Individual Value

Need What matters?

THE FLOW OF WORK

Project with only 3 rules:

Do No Harm

Don't Change IT
Yet.

Don't Break the
Law

New Referral – David 65 year old diabetic.

Aggressive

Non compliant

Poor sight

Rude

Smoker

David: HbA1C Levels:

- March 2019 – 139
 - August 2019 – 73
 - October 2019 – 108
 - January 2020 – 154
 - June 2020 – 185
 - October 2020 – 167
 - April 2021 – 108
 - August 2021 – 57
 - November 2021 – 47
 - November 2022 – 51
 - May 2023 - 47
- Diabetic specialist nurse involved.
- Discharged to self care.
- Pharmacy review. Stopped taking medication in November 2019
- Refused to engage with DSN.
- My initial visit to find out what mattered to David.

Kathleen – New referral COPD

Ambulances:

21.11.22 - Leicester

27.11.22 – Nottingham

02.02.23 16:21 – Grantham

17.02.23 09:20 – Grantham

01.03.23 09:14 – Grantham

03.04.23 08:55 – Boston

09.05.23 08:52 – Lincoln

02.06.23 05:33 – Lincoln

9 Ambulances
9 Admissions
in 8 Months.

General Themes

Understanding the person is the critical factor.

Trust is key to change.

Continuity is crucial.

Lots of resources and specialist interventions have been used.

In many cases to little effect.

Non-clinical interventions made the difference.

Different organisational processes and policies can cause tension.

Criteria based systems are difficult to work with.

The solutions that were put in place were not sophisticated.

Intervention Effect Analysis

22 people

2–12-month intervention period

Average period 5.8 months

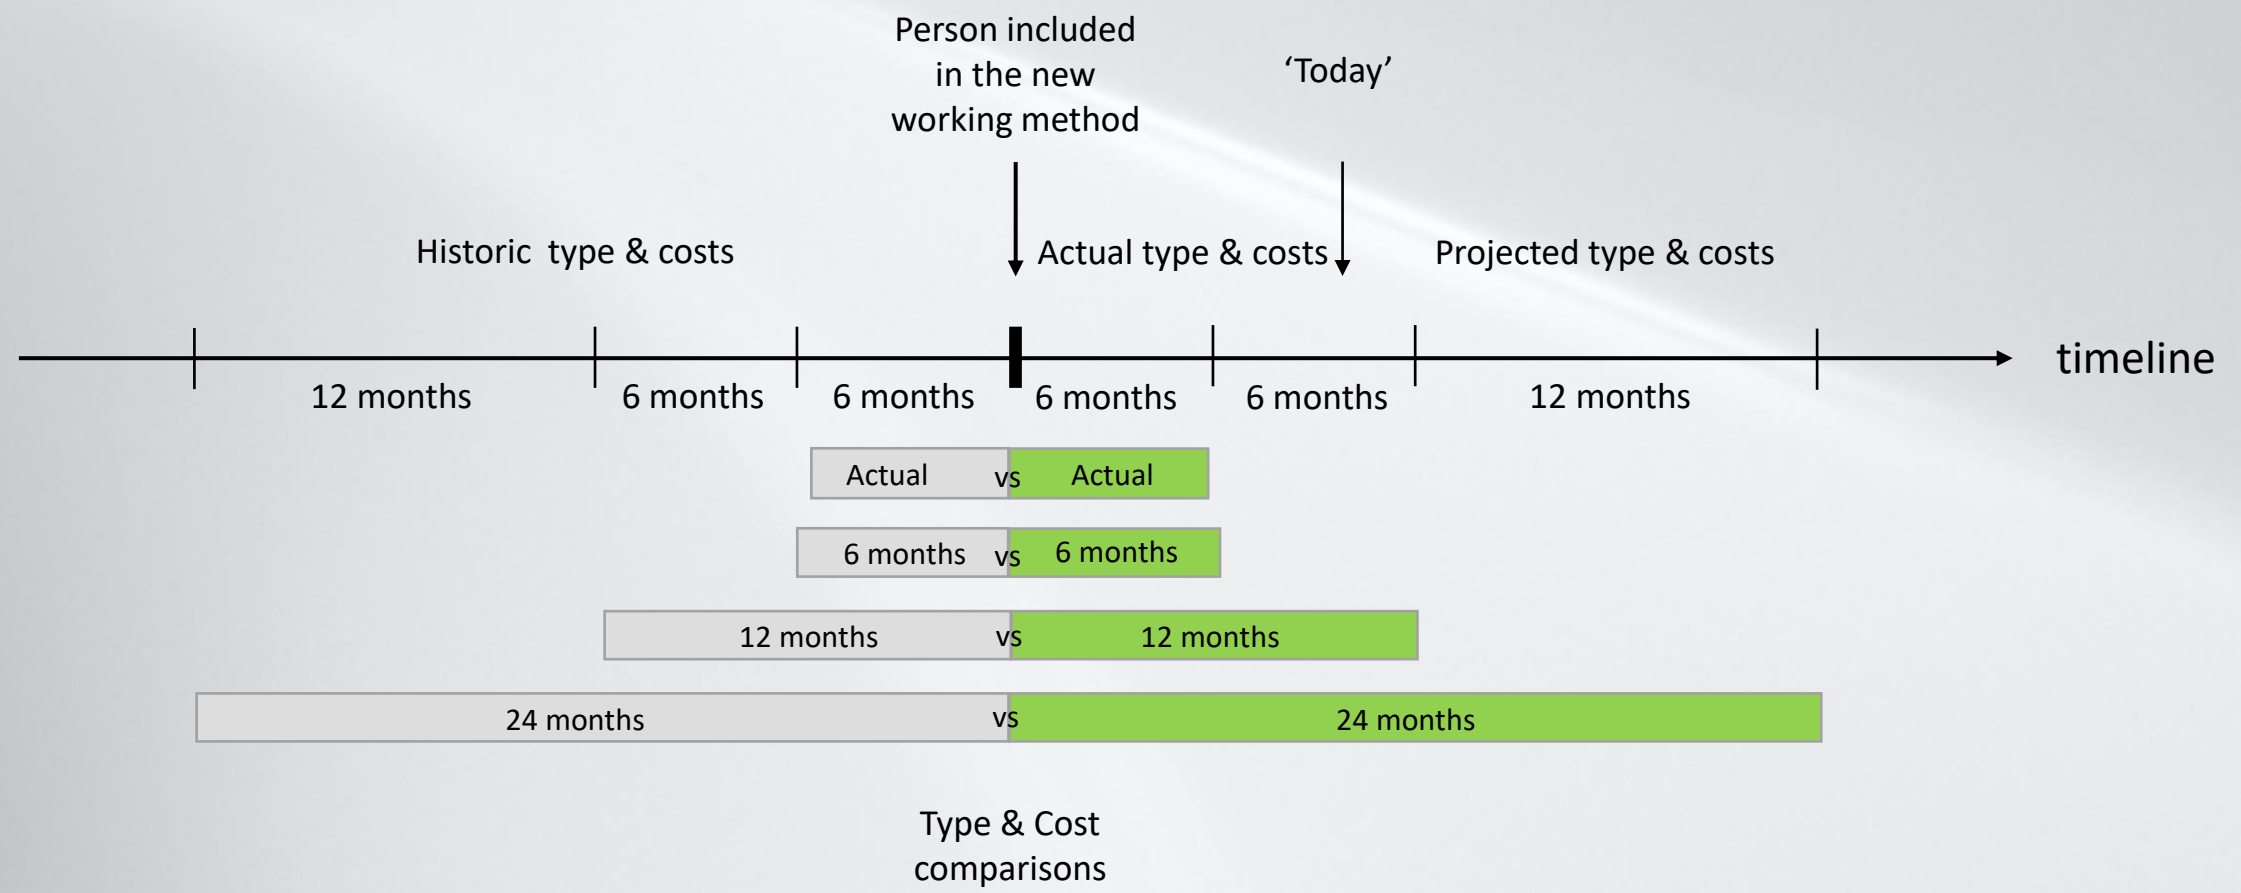

Intervention Effect Analysis

Costs applied in the analysis:

- A&E visits £154/visit
- Ambulance services £300/call out
- Hospital stays £3311/stay
- NHS 111 calls £35/call
- Out of hours service £75/use
- Specialist service use £100/use

*hospital stays based on Non-Elective Admission not extended bed days count

** not included social care costs, GP cost, additional specialist services, new costs such as new entry into care home are not calculated nor subsequent reductions in care package, benefits and allowances.

Intervention Effect Analysis – Projected savings

Data sample – 22 people

	Historic vs Projected costs			
	Actual savings	6 month savings	12 month savings	24 month savings
A&E	26	35	50	74
Ambulance Service	47	43	63	79
Hospital Discharge	28	33	52	105
NHS 111 Service	43	38	75	61
Out of Hours	5	-3	-3	-78
Specialist Services	27	32	68	39
A&E	£ 4,055.33	£ 5,411.00	£ 7,707.00	£ 11,410.00
Ambulance Service	£ 15,622.60	£ 14,327.85	£ 21,005.52	£ 26,601.03
Hospital Discharge	£ 91,965.15	£ 109,263.00	£ 172,974.67	£ 349,260.33
NHS 111 Service	£ 1,511.96	£ 1,343.79	£ 2,614.40	£ 2,148.79
Out of Hours	£ 347.60	£ (250.11)	£ (219.77)	£ (5,839.55)
Specialist Services	£ 2,687.82	£ 3,179.09	£ 6,831.52	£ 3,863.03
Total	£ 116,190.45	£ 133,274.61	£ 210,913.33	£ 387,443.64

Projected savings

6 months 77%	12 months 75%	24 months 71%
-------------------------------	--------------------------------	--------------------------------

Overall conclusions on the Experiment

Next Steps

Roll-out – ‘here is the answer, now do it’

Roll-in – ‘learning experience that involves studying the system from the person’s perspective and applying the method in individual practices’
